

EZS2 Secondary Cleaner

The Economical, Efficient Belt Cleaning Solution

The EZS2 Secondary Belt Cleaner improves belt cleaning efficiency and reduces routine maintenance tasks. And it does all of this at an affordable price. Add easy, do-it-yourself installation and it makes an unbeatable solution for your conveyor belt cleaning needs.

Features and Benefits

- **Cleaning efficiency of metal blades.** The thin, hard edges of the metal blades deliver high cleaning efficiency and long wear life.
- **Works with Flexco mechanical splices.** The tungsten carbide-tipped blades are impact-resistant, and the spring cushion allows them to move away from a passing splice without damage and with minimal cleaning disruption.
- **A complete cleaning system.** When the EZS2 is teamed with the EZP1 Precleaner, the system provides maximum cleaning power for tough applications.
- **Fits most conveyor structures.** Available for belt widths from 450 mm to 1800 mm (18" to 72").

EZS2

Rockline® Secondary Cleaner

Specifications and Guidelines

Maximum Belt Speed

3.5 m/s (700 FPM)

Temperature Rating

-35° C to 93° C (-30° F to 200° F)

Usable Blade Wear Length

9 mm (3/8")

Available for Belt Widths

450 to 1800 mm (18" to 72")
