

H-TYPE® Precleaner with V- or VP-Tips

High Efficiency Tungsten-Carbide Precleaner

The Flexco H-Type® Precleaner with V- or Protected V-Tips is designed to be positioned on the head pulley and to remove the bulk of the carryback from the belt. Proven performance over 20 years as the most efficient pre-cleaner in material handling applications such as coal, iron ore, bauxite and hard rock mining with vulcanized belts.

Features and Benefits

- **Works with vulcanized belts.** The tungsten carbide tips allow for maximum cleaning efficiency and superior wear characteristics. Also available with protected tips for abrasive applications.
- **Complete cleaning system.** When teamed with a secondary cleaner, it makes up a system that delivers maximum cleaning power for the most abusive conveyor applications.
- **Made for mining conveyors.** Made from heavy-duty steel with corrosion-resistant powder coating, the H-Type is available in sizes for belt widths from 450 to 1800mm (18" to 72"). Additional sizes are available upon request.
- **Optimal positioning.** Blade contact on the pulley is 15° below the horizontal centerline. This keeps the blades out of the discharge path and protects them from rocks, large lumps and other debris.

H-TYPE® Precleaner with V- or VP-Tips

Specifications and Guidelines

Maximum Belt Speed

5 m/s (1000 FPM)

Temperature Rating

-35° C to 82° C (-30° F to 180° F)

Minimum Pulley Diameter

250mm (10")

CEMA Cleaner Rating

Class 4

Usable Blade Wear Length

9mm (3/8")

Blade Material

Tungsten carbide (for vulcanized belts only)

Available for Belt Widths

450 to 1800mm (18" to 72")

Pole Length

Cleaner size + 1200mm (48")

Maximum Conveyor Span

Cleaner size + 950mm (38")

Horizontal Clearance Required
175mm (7")

Vertical Clearance Required

SS: 325mm (13")

S: 375mm (15")

M: 413mm (16-1/2")

L: 463mm (18-1/2")

LL: 550mm (22")
